MAN GENUINE PARTS KITS

All in one.

WHY STOP HALFWAY?

Go all the way.
With MAN Genuine Parts kits.

What's the most expensive thing about a vehicle? When it's not working. To keep this time to a minimum or to avoid it altogether, you need the right strategy for maximum efficiency.

We're working on this – from every angle – and using networked intelligent services along with products that are perfectly coordinated with each other. An excellent example is MAN Genuine Parts kits. When repairs become necessary, it's usually a good idea to replace an

entire unit. This includes the peripheral parts that need to be replaced at the same time.

The resulting cost may be high in the short term, but the extra parts would cost more if purchased separately, and in the long term, you can save significantly by preventing additional trips to the workshop.

Using MAN Genuine Parts kits also shortens the time needed for repairs and optimises the availability of spare parts.

The portfolio of MAN Genuine Parts kits currently includes 11 component groups, that make up a total package.

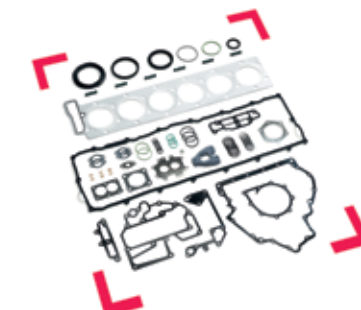

MAN Genuine Engine Overhaul Kit

- Cylinder head gasket and oil pan gasket (M)/all engine gaskets (L)
- Engine pistons and cylinder liners
- Connecting-rod bearing (M/L)
- Crankshaft bearing (L)
